DETAILED ACTION

Allowable Subject Matter

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for securely distributing content to an unsecure site. Each independent claim identifies the uniquely distinct features of "computing for each document, from the encrypted document content for that document, a document identifier that cannot be derived solely from the encrypted version of the requested document; creating a list of document identifier and decryption key pairs; assembling the encrypted document content for each content document and the list into a distribution archive; and encrypting the distribution archive with a scheduled key". The closest prior art, Pensak (US 6,449,721), discloses a conventional digital rights management system that fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
